

**VEX 123
ROBOTICS
COMPETITION
SAVE THE EARTH**

Robot Rules:

1. The Robot VEX 123 has built-in motors and sensors for movement in environment around it.
2. In the first match, from step 1 to step 4 we will use touch buttons (move – turns – sound – start code)
3. In the second match, from step 4 to step 6 we will use the coder and coder cards, but first we need to connect the robot to the coder.
4. In the third match, from step 6 to end we will use coding blocks, but first we need to connect the robot to the laptop or tablet.

(Rules of the VEX 123 Competition: Save the Earth Game)

The project includes 7 tasks that the child needs to complete in order for the robot to carry out its movement and successfully complete the assigned mission.

The competition centers around an environmental preservation project set on a field that features a house, a crane, garbage collection center, 2 bridges and a number train. The field also includes roads to enable the robot to move smoothly.

 The robot follows 7 steps to move and accomplish the mission. It begins with Task 1 and proceeds through Task 7, completing each task successfully. Once all tasks are done, the robot reaches

VEX 123

the finish line, having completed its mission in the environment.

Throughout this process, the child enhances their thinking skills, creativity, and problem-solving abilities in order to determine how to complete the tasks effectively.

Tasks that will be performed by the robot while moving:

1. From step 1 to step 4

Collecting garbage and transporting it to the garbage collection center.

2. From step 4 to step 6

Picking up the number (4) and placing it on the number train

3. From step 6 to End

The robot takes the missing part of the building, goes to the right spot, and puts it in place.

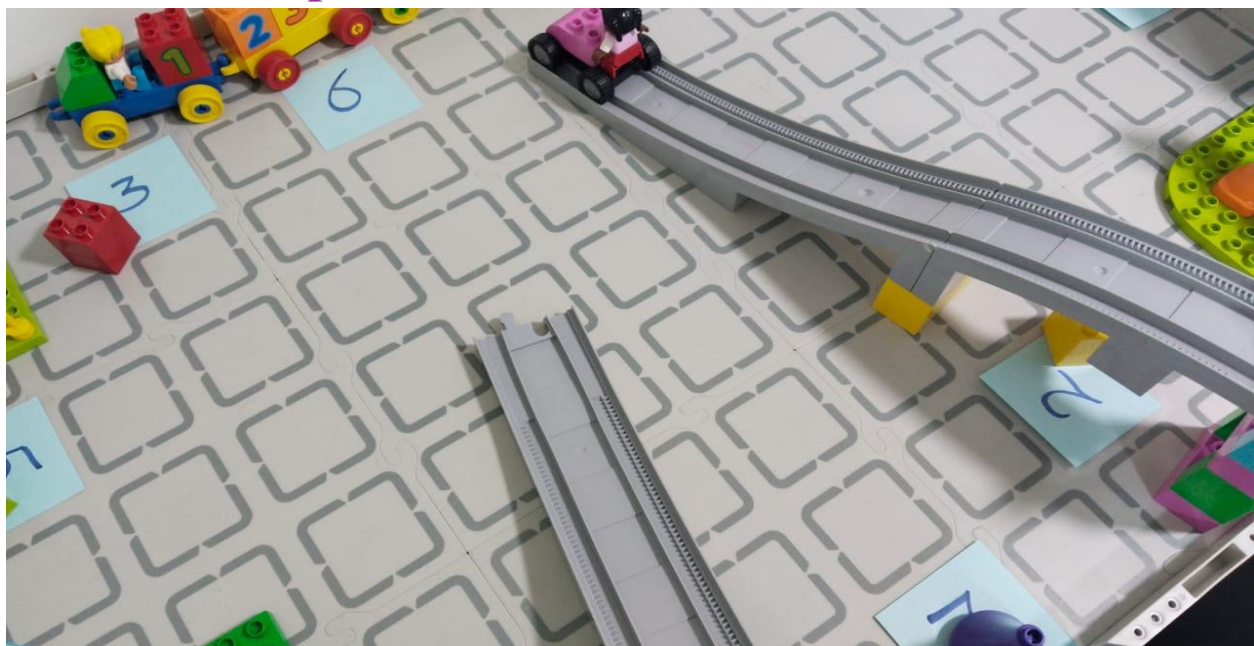

VEX 123

The steps that the child needs to understand for the competition are as follows:

1. First Step: From Point 1 to Point 2

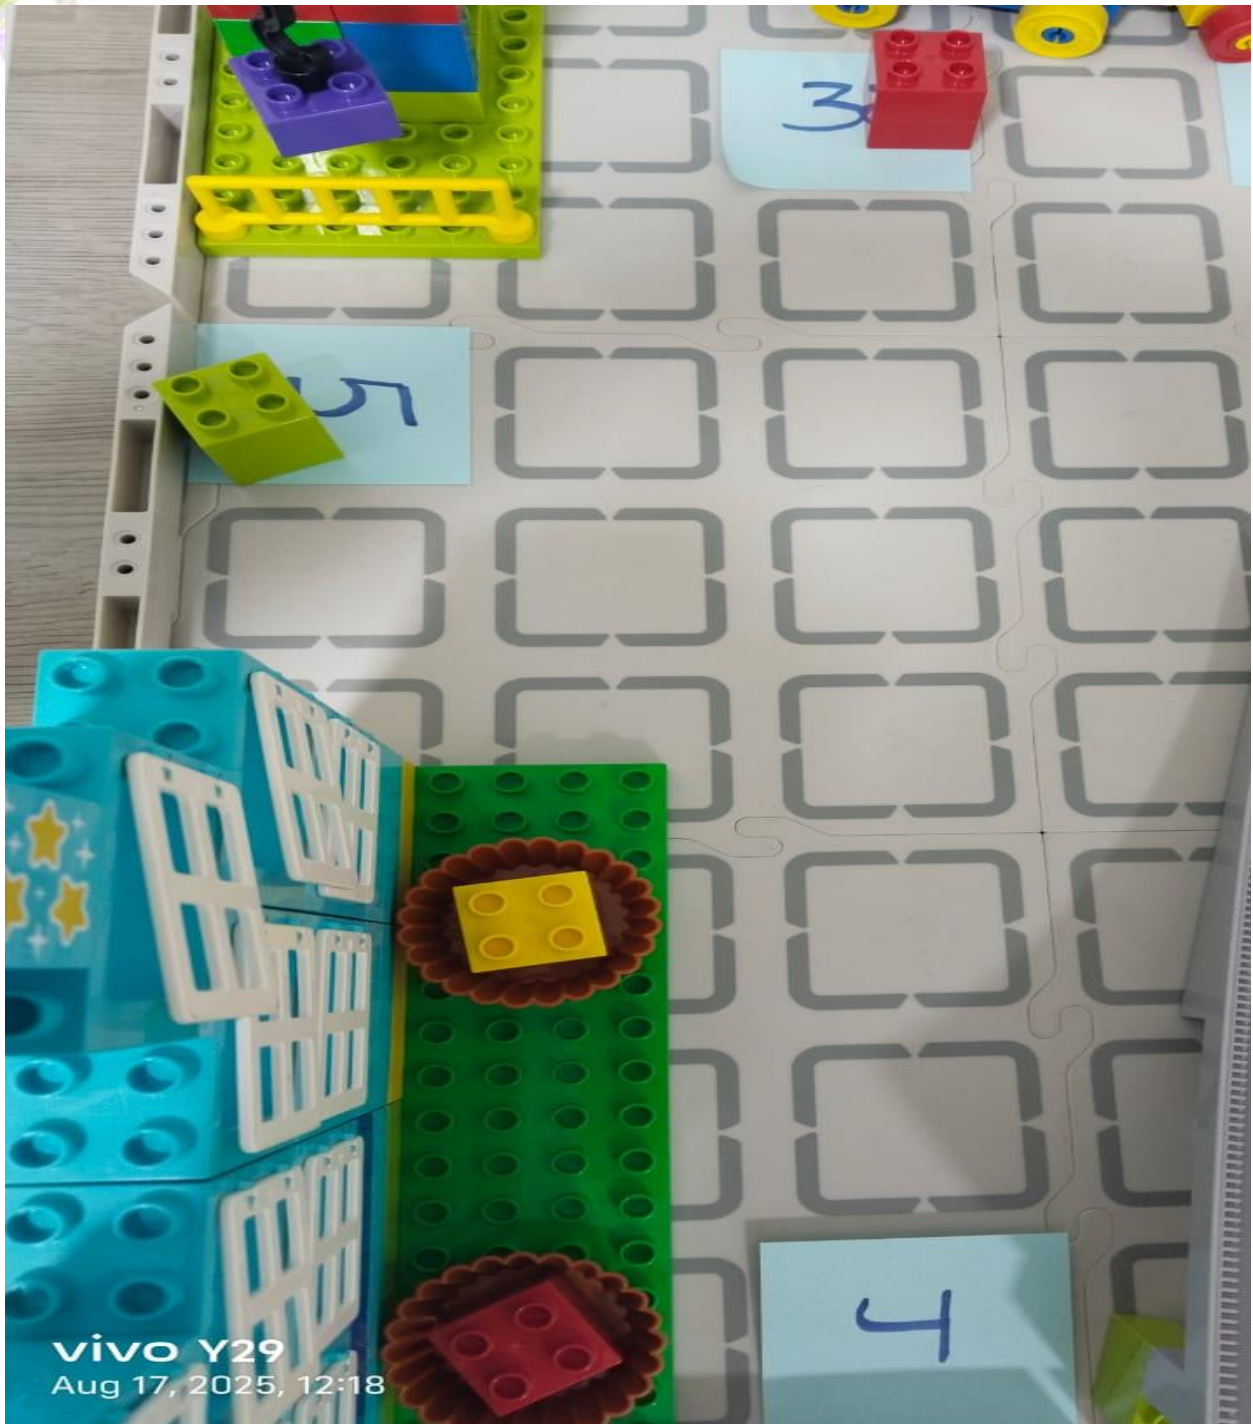

2. Second Step: From Point 2 to Point 3

VEX 123

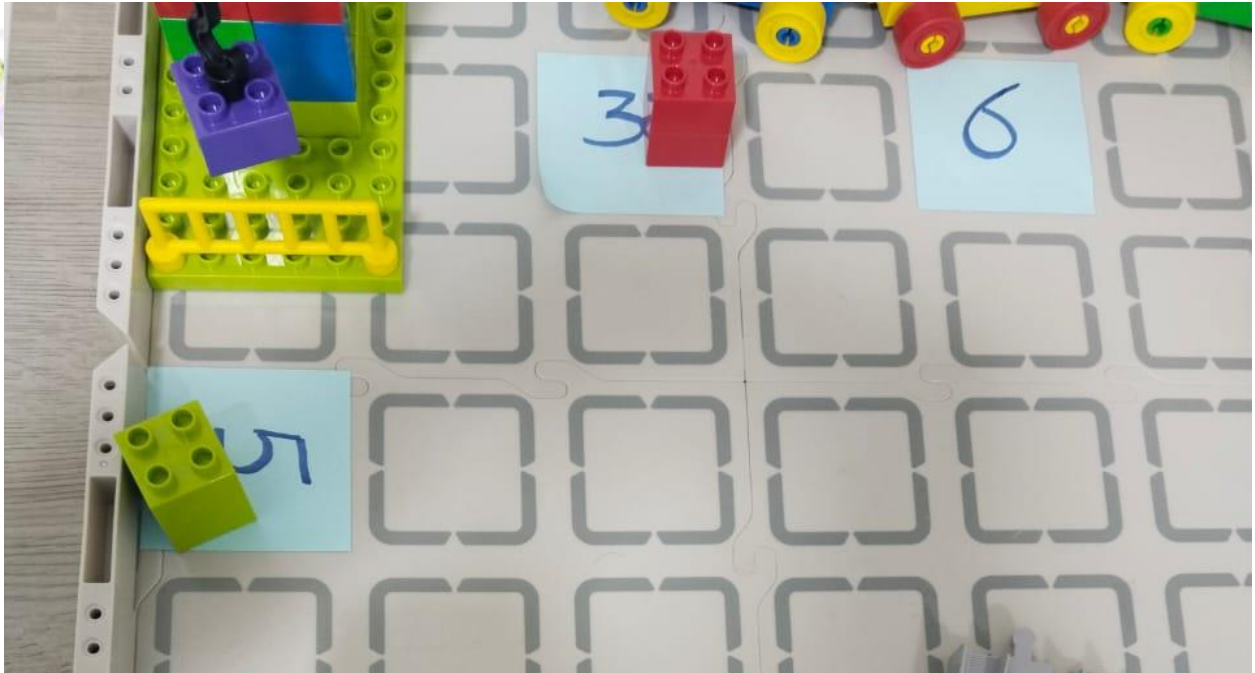

3. Third Step: From Point 3 to Point 4

4. Fourth Step: From Point 4 to Point 5

VEX 123

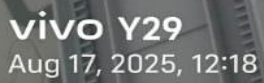

5. Fifth Step: From Point 5 to Point 6

6. Sixth Step: From Point 6 to Point 7

7. Seventh Step: Form Point 7 to the end

Each step is worth 5 points, except for Step 4, Step 6, and Step 7

The scoring breakdown is as follows:

Score for step (1) 5 points 🦾🤖

Score for step (2) 5 points 🦾🤖

Score for step (3) 5 points 🦾🤖

Score for step (4) 10 points 🦾🤖

Score for step (5) 5 points 🦾🤖

Score for step (6) 10 points 🦾🤖

Score for step (7) 10 points 🦾🤖

The final total score is (50) points, this is the highest score possible in the competition.

Each team needs to get enough points before time runs out to win.

The team that gets the most points in the least amount of time is the winner.
